

Project Design Phase

Problem – Solution Fit Template

Date	01 July 2026
Team ID	SWTID-2026-9246
Project Name	AI-Enabled Student Admission System
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ Understand the existing situation in order to improve it for your target group.

Define the WHO & WHAT	1. CUSTOMER SEGMENTS Who is your customer? List the segments of the people who use or benefit from the solution. - Prospective Students - Current Students - Admission Officers - Academic Counselors - University Administrators - Parents / Guardians	CS	6. CUSTOMER CONSTRAINTS What constraints or barriers do customers face while trying to solve the problem? (e.g., time, cost, manual processes, lack of visibility, outdated systems) - Manual and time-consuming admission processes - Lack of real-time visibility into applicant status - High volume of queries handled manually - Errors in data entry and duplicate records - Limited ability to predict yield, enrollment & dropout risk - Siloed communication across departments	CC	5. AVAILABLE SOLUTIONS What solutions are customers or the competitors using today to solve the problem? (Include both manual and digital solutions) - Spreadsheets and manual tracking - Standalone form tools (e.g., Google Forms) - Basic admission portals without automation - Email-based communication - Legacy Student Information Systems (SIS) - Third-party CRMs with limited education features	AS	
	2. JOBS-TO-BE-DONE / PROBLEMS What jobs (tasks) or problems are customers trying to solve? What are the main pain points? - Simplify and accelerate the admission process - Accurately evaluate and shortlist applicants - Improve communication with applicants - Reduce manual work and operational errors - Predict enrollment and identify at-risk students - Ensure a seamless experience for students and staff	JtBD	9. PROBLEM ROOT CAUSE What is the real cause behind these problems? Why do they exist persistently? - Disconnected systems and tools - Lack of automation and AI capabilities - Data scattered across multiple sources - Manual approval and review processes - No predictive insights to support decisions - Limited self-service and real-time updates	RC	7. BEHAVIOUR What does your customer do in response to the problems? (How do they cope, work around or adapt?) - Spend extra time on data entry and follow-ups - Use multiple tools to manage a single process - Rely on experience for decision making - Delay communication due to workload - Work around system limitations with manual steps - Accept delays and errors as part of the process	BE	
Explore the PAIN & its impact	3. TRIGGERS What triggers customers to start looking for a solution? What events or situations create urgency? - High applicant volume during admission season - Delays and errors impacting student experience - Competitive pressure from other institutions - Demand for better reports and decision insights	TR	10. YOUR SOLUTION How does your solution address the root cause and solve the problem better than existing options? Salesforce AI Enabled Student Admission System - Automated application intake and eligibility checks - AI-driven applicant scoring and risk prediction 360° view of applicants in Salesforce - Real-time dashboards and reports - Personalized communication via Journey Builder - Seamless collaboration across departments - Scalable, secure, and mobile-friendly platform		SL	8. CHANNELS of BEHAVIOUR Where and when do customers take action? Which channels or platforms do they use? - University website and admission portal - Email and SMS - Phone calls and in-person visits - Social media and chat support	CH
	4. EXISTING BEHAVIORS / ACTIONS How do customers solve the problem today? List the current workflows, manual steps, or tools in use. - Manual form reviews and data validation - Email and phone follow-ups - Excel sheets for tracking and reporting - Separate tools for communication and documents	EM	11. FUTURE How will customers achieve better outcomes in the future with your solution? - Faster admissions with higher accuracy - Better applicant experience and engagement - Data-driven decisions and improved yield - Stronger brand reputation and student retention				
Identify how to FIX it	Create Value & Measure Outcome
