

AI-Enabled Student Admission System

1. INTRODUCTION

1.1 Project Overview

The AI-Enabled Student Admissions & Support Management System is a centralized Salesforce application designed to streamline and enhance student admissions using AI-driven intelligence and automation.

The system enables:

- AI-based student application prioritization
- Intelligent admission and discount recommendations
- Risk identification for enrollments
- Real-time alerts for high-priority applications
- Centralized visibility into admission performance

1.2 Purpose

The primary purpose of the AI Enabled Student Admission System is to digitize and automate the student admission process by providing a unified Salesforce-based platform that minimizes manual intervention and enhances operational efficiency.

The project aims to:

- Centralize student and course information in a single CRM platform.
- Streamline the admission workflow from application submission to final enrollment.
- Automate repetitive administrative tasks through Salesforce Flow.
- Implement secure access using Salesforce security features.
- Provide real-time insights through reports and dashboards.
- Utilize Agentforce AI to assist counselors, administrators, and support staff with intelligent recommendations and automated responses.
- Improve communication between students and institutional staff.
- Enable faster decision-making with AI-powered assistance.

The solution demonstrates how Salesforce CRM can be applied to solve real-world educational management challenges using declarative tools without requiring custom Apex development.

2. IDEATION PHASE

2.1 Problem Statement

Many educational institutions continue to manage student admissions using spreadsheets, emails, paper forms, or multiple disconnected software applications. These traditional methods introduce several operational challenges that reduce efficiency and increase administrative workload.

These issues result in slower admission processing, reduced productivity, and poor user experience.

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Admission Counselor	Manage student inquiries and applications	Data is entered manually in multiple places	Lack of centralized system and automation	Overwhelmed and inefficient
PS-2	Academic Manager	Track enrollments and approvals	Approvals take too long	Manual approval process and no visibility	Frustrated and concerned
PS-3	Student	Get updates and information about admission	Do not receive timely updates	No automated notifications or tracking	Uncertain and anxious

2.2 Empathy Map Canvas

Aspect	Description
Think & Feel	Need accurate student and course data, real-time status and insights
Hear	Feedback from students, parents, and management
See	Multiple spreadsheets, emails, and disconnected systems
Say & Do	Enter data manually, send emails, follow up for approvals
Pain	Data duplication, delays, lack of visibility, manual effort
Gain	Automation, real-time insights, timely communication, AI assistance

2.3 Brainstorming

Brainstormed Ideas

S. No.	Brainstormed Ideas
1	Manual Student Admission Management
2	Excel-Based Student Admission Tracking
3	Web-Based Student Admission Portal
4	Cloud-Based Student Admission Management System
5	Salesforce-Based Student Admission CRM
6	AI-Enabled Student Admission & Support Management System

2.4 Idea Selection

Selected Idea	AI-Enabled Student Admission & Support Management System using Salesforce Agentforce	
Reason for Selection	The selected solution leverages Salesforce Agentforce and AI capabilities to automate and optimize the entire student admission lifecycle. It improves efficiency, enhances student experience, provides intelligent insights, and supports data-driven decision-making.	
Advantages	- AI-based application prioritization - Intelligent admission recommendations - Automated student communication - Real-time dashboards and reports - Reduced manual processing time - Improved admission accuracy - Better student engagement - Secure cloud-based data management - Scalable for multiple institutions	
Disadvantages	- Requires Salesforce license - Internet dependency - Initial AI model configuration - Requires user training - Periodic AI model updates for better accuracy	

3. REQUIREMENT ANALYSIS

3.1 Customer Journey map

Journey Stages	1. Inquiry & Awareness	2. Application Submission	3. Application Review	4. Approval Process	5. Enrollment & Course Allocation	6. Payment & Confirmation	7. Student Support & Communication	8. Reporting & Insights
Actions	 Student explores courses and raises an inquiry.	 Student fills and submits the application form.	 Counselor reviews application & documents.	 Application sent for approval to management.	 Student enrolled in course and allocated batch.	 Student makes payment and gets confirmation.	 Student receives updates, reminders and support.	 Admins and managers view reports and AI insights.
Touchpoints (Channels)	Website, Social Media, Email, Phone	Web Portal, Mobile Form	Counselor Console, Salesforce	Salesforce Approval Process	Counselor Console, Student Portal	Payment Gateway, Salesforce	Email, SMS, Portal, Chatter	Dashboards, Reports, Agentforce
System (Backend)	Inquiry captured in Salesforce (Opportunity – Inquiry Stage)	Application created in Salesforce (Opportunity – Applied Stage)	Records verified & scored using AI (Priority & Risk Score)	Approval workflow triggered (Pending → Approved/Rejected)	Enrollment record created (Student_Enrollment__c)	Payment recorded & status updated (Paid/Partial)	Automated alerts & communication via Email Alerts & Flows	Reports & Dashboards with AI-driven recommendations
Emotions	 Curious	 Hopeful	 Anxious	 Waiting	 Excited	 Relieved	 Supported	 Confident
Pain Points	 Hard to find right information.	 Form filling may be time-consuming.	 Delays due to manual verification.	 Long approval turnaround.	 Wrong batch/course allocation.	 Payment failures or delays.	 Missed updates or unclear information.	 Non-real-time or uncattered data.
Opportunities (With AI + Automation)	 AI Chatbot answers queries and suggests relevant courses.	 AI pre-fills data & validates documents.	 AI scores application and highlights risks & missing documents.	 AI recommends priority approvals.	 AI suggests best-fit course & batch.	 AI detects failed payments and sends reminders.	 AI assistant answers FAQs & guides students.	 AI dashboards provide real-time insights & predictions.
Outcome	Inquiry recorded & assigned to counselor.	Application submitted successfully.	Reviewed application with AI insights.	Application approved or rejected.	Student enrolled successfully.	Payment confirmed & admission confirmed.	Student stays informed and engaged.	Data-driven decisions & improved outcomes.

Journey Goal: Provide a seamless, AI-assisted admission experience from inquiry to enrollment and support, ensuring transparency, efficiency, and better decision-making for students and institutions.

3.2 Solution Requirements

FR No	Requirement
FR-1	User Login and Authentication
FR-2	Create and Manage Contacts (Students)
FR-3	Track Admission Opportunities
FR-4	Manage Courses
FR-5	Enroll Students in Courses
FR-6	Validate Data Using Validation Rules
FR-7	Approval Process for Enrollments
FR-8	Automate Processes Using Flows
FR-9	Send Email Alerts to Students and Staff
FR-10	AI Assistance Using Agentforce
FR-11	Reports and Dashboards
FR-12	Security and Access Control
FR-13	Lightning App with User-Friendly UI

3.3 Data Flow Diagram

The Data Flow Diagram illustrates how student admission information flows through the Salesforce-based system. Students submit applications, which are stored in Salesforce objects. Agentforce AI analyzes each application and generates priority scores, risk assessments, and admission recommendations.

3.4 Technology Stack

The AI-Enabled Student Admission & Support Management System is developed using Salesforce's low-code platform and AI capabilities. Salesforce Lightning Experience provides the user interface, while Flow Builder automates admission workflows. Agentforce

delivers AI-powered recommendations and insights for admission counselors. Data Import Wizard and Data Loader are used for migration, while Reports and Dashboards provide analytics. Validation Rules, Approval Processes, and Salesforce Security ensure accurate and secure data management.

A technology stack pyramid or layered diagram:

4. PROJECT DESIGN

4.1 Problem Solution Fit

Traditional admission systems rely on manual processes, spreadsheets, and disconnected tools, leading to duplicate records, delayed approvals, and poor visibility. The proposed Salesforce solution addresses these issues by centralizing student information, automating admission workflows, and providing AI-powered recommendations for faster and more accurate decision-making.

4.2 Proposed Solution

The proposed solution is a Salesforce-based application that manages students, courses, and enrollments using standard and custom objects. Agentforce analyzes admission data to prioritize applications, identify risks, and recommend actions. Automated approval workflows, email notifications, reports, and dashboards help counselors and administrators manage admissions efficiently.

4.3 Solution Architecture

The system architecture consists of users interacting with Salesforce Lightning Experience. Student data is stored in Salesforce objects, business logic is executed using Flow Builder and Approval Processes, Agentforce generates AI recommendations, and Reports & Dashboards provide analytical insights. Email Alerts notify users of important admission events.

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

The project plan defines the milestones required for successful implementation. Activities include requirement gathering, object creation, automation, Agentforce configuration, testing, deployment, and documentation. Proper planning ensured timely completion and reduced implementation risks.

1. Requirement Analysis and Planning Phase
2. Salesforce Development – Backend & Configuration
3. UI/UX Development & Customization
4. Data Migration, Testing & Security
5. Deployment, Documentation & Maintenance

6. FUNCTIONAL AND PERFORMANCE TESTING

6.1 Performance Testing

Testing ensured reliable functioning of the AI-assisted student admission lifecycle, from application creation to enrollment approval and AI-driven prioritization.

Testing Types Conducted:

I. Unit Testing

- Verified Apex logic (if applicable) for:
 - AI priority score calculation
 - Risk analysis logic
 - Approval status updates
- Ensured compliance with Salesforce governor limits
- Achieved required test coverage for all Apex components

II. Integration Testing

- Verified relationships between:
 - Student and Student Enrollment
 - Course and Student Enrollment
- Tested interaction between:
 - Record-Triggered Flows
 - Approval Processes
 - Email Alerts
 - Agentforce prompt actions
- Validated seamless handoff between:
 - Backend automation
 - UI components
 - AI recommendations

III. User Acceptance Testing (UAT)

- Conducted with sample users:
 - Admission Counselor
 - Admission Manager
 - System Administrator

UAT Scenarios:

- Creating and updating student records
- Creating student enrollments
- Automatic AI priority identification
- Submitting high-discount enrollments for approval

- Reviewing AI-generated summaries and risk insights
- Approving or rejecting enrollments
- Receiving email alerts and notifications

Outcome:

- User feedback collected and implemented
- Improved clarity of AI priority indicators
- Optimized page layouts for admission workflows
- Confirmed smooth operation across desktop and mobile devices

7. RESULTS

SAMPLE OUTPUT:

8. ADVANTAGES & DISADVANTAGES

ADVANTAGES:

- Centralized management of student, course, and enrollment data.
- AI-powered recommendations for faster admission decisions.
- Automated workflows reduce manual effort and approval time.
- Secure role-based access protects sensitive information.
- Real-time reports and dashboards improve decision-making.
- Scalable and easy to maintain using Salesforce's low-code platform.

DISADVANTAGES:

- Requires Salesforce licenses and cloud infrastructure.
- Users need training to effectively use Salesforce and Agentforce.
- Performance depends on internet connectivity.
- AI recommendations rely on accurate and complete data.
- Advanced customizations may require Apex development.

9. CONCLUSION

The **AI-Enabled Student Admission & Support Management System** successfully demonstrates how Salesforce CRM and Agentforce AI can be utilized to modernize and automate the student admission process. The application provides a centralized platform for managing student information, course details, enrollments, approvals, and communication while reducing manual effort through intelligent automation.

By implementing custom objects, validation rules, approval processes, email automation, Lightning components, Dynamic Forms, and Salesforce Flows, the system streamlines admission workflows and ensures data accuracy. The integration of Agentforce AI enhances decision-making by providing intelligent

recommendations, risk analysis, and application prioritization, enabling admission teams to process applications more efficiently.

The project also emphasizes security through role-based access control, profiles, and sharing rules, ensuring that sensitive student information is protected. Comprehensive testing and deployment practices ensure that the application is reliable, scalable, and ready for real-world implementation.

10.FUTURE SCOPE

- Develop a student self-service web/mobile portal.
- Integrate AI chatbot for 24/7 admission support.
- Add online fee payment and document OCR verification.
- Implement predictive analytics for admission trends.
- Integrate with Learning Management Systems (LMS) and WhatsApp/email notifications.
